

pg questions set 4

Question 101: Commonest manifestation of alcohol withdrawal syndrome

is ?

- A) Tremors
- B) Diarrhoea
- C) Lacrimation
- D)

Question 102: Commonest site for CSF rhinorrhoea is ?

- A) Ethmoid sinus
- B) Frontal sinus
- C) Petrous
- D) Sphenoid sinus

Question 103: Conversion of short term memory to long term memory

occurs in ?

- A) Frontal cortex
- B) Hippocampus
- C) Amygdala
- D)

Question 104: CSF picture in Tubercular meningitis ?

- A) increased protein, increased sugars, increased lymphocytes
- B) increased protein, decreased sugars, increased lymphocytes
- C) decreased protein, increased sugars, increased lymphocytes
- D) decreased protein, decreased sugars, increased lymphocytes

Question 105: Delusion is a disorder of ?

- A) Thought
- B) Perception
- C) Insight
- D) Cognition

Question 106: Dexamethasone is given to mother in third trimester ?

- A) To reduce hyaline membrane disease / Fetal pulmonary maturity
- B)
- C)
- D)

Question 107: Dinitrophenol causes ?

- A) Uncoupling of Electron Transport Chain and oxidative phosphorylation
- B)
- C)
- D)

Question 108: Direct standardization is used to compare the mortality rates

between two countries. This is done because of differences in ?

- A) Causes of death
- B) Numerators
- C) Age distributions
- D) Denominators

Question 109: Drug induced lupus erythematosus is most frequently

associated with ?

- A) anti-histone antibodies
- B) anti-ro antibodies
- C) anti-centromere antibodies
- D) anti-mitochondrial antibodies

Question 110: Drug not used in erectile dysfunction is ?

- A) Phenylephrine
- B) Testosterone
- C) Alprostadil
- D)

Question 111: Drug of choice for OCD ?

- A) Imipramine
- B) Fluoxetine
- C) Chlorpromazine
- D) Benzodiazepine

Question 112: Drug used in obesity are all except ?

- A) Sibutramine
- B) Orlistat
- C) Olestra
- D) Neuropeptide y analogue

Question 113: Dubin Johnson syndrome, test used is ?

- A) Gamma Glutamyl Transferase
- B) Bromosulphthalein test
- C) Hippurate test
- D) Transaminase

Question 114: Earliest milestone to be achieved is ?

- A) Mirror Gazing / Playing
- B) Pincer grip
- C) Crawling
- D) Creeping

Question 115: ECG manifestations of hypokalemia include ?

- A) Tall t waves
- B) PR prolongation with ST depression
- C) Flattening of P wave
- D) Broad QRS

Question 116: Enzyme not stable at acidic pH are all except ?

- A) Trypsin
- B) Chymotrypsin
- C) Pepsin
- D) Carboxypeptidase

Question 117: External cephalic version is contraindicated in ?

- A) Anemia
- B) Flexed Breech
- C) PIH
- D)

Question 118: FAB L3 refers to ?

- A) pre-B ALL
- B) T cell ALL
- C) B cell ALL
- D) Mixed ALL

Question 119: Factor present in final common complement pathway ?

- A) C4
- B) C3
- C) C5
- D) Protein B
- E) C2

Question 120: Fetus with increased nuchal translucency at 14 wks is seen

in ?

- A) Down's syndrome
- B) Esophageal atresia
- C) Turner's syndrome
- D)

Question 121: Fibroid causes all of the following except ?

- A) Menstrual irregularities
- B) Infertility
- C) Abdominal Mass
- D) Amenorrhoea

Question 122: Filgrastim is used in the treatment of ?

- A) Neutropenia
- B) Filaria
- C) Malaria
- D) Anaemia

Question 123: Finasteride acts via ?

- A) Alpha blockade
- B) 5-alpha reductase inhibition
- C) Selective alpha-1 blockade
- D) Androgen receptor antagonism

Question 124: Findings in DIC include all except ?

- A) increased fibrinogen, increased antithrombin III, increased

thrombin-antithrombin complexes

- B) increased FDP, decreased PT, increased antithrombin III
- C) increased FDP, prolonged PT, increased thrombin-antithrombin

complexes

- D) increased FDP, prolonged PT, reduced platelets

Question 125: For protein purification and analysis all are used except ?

- A) centrifugation
- B) densitometry
- C) electrophoresis
- D) chromatography

Question 126: Good prognostic factors in childhood leukemia are all

except ?

- A) Common ALL subtype
- B) pre-B ALL
- C) Hyperploidy
- D) Female gender

Question 127: Heart muscle all true except ?

- A) Acts as syncytium
- B) has multiple nuclei
- C) has gap junctions
- D)

Question 128: Herd immunity, all are true except ?

- A) Depends on clinical and subclinical cases
- B) Influenced by immunization
- C) Depends on presence of alternate host
- D) Herd immunity is constant

Question 129: Hereditary spherocytosis is due to deficiency of all except ?

- A) ankyrin
- B) spectrin
- C) anion exchanger
- D) glycophorin 2

Question 130: HMP shunt occurs in ?

- A) Cytosol
- B) Mitochondria
- C) Endoplasmic reticulum
- D)

Question 131: HMP Shunt Oxidase phase generates ?

- A) Ribose
- B) NADPH
- C) Pyruvate is formed by the non-oxidative phase
- D)

Question 132: Hormone not secreted by kidney ?

- A) Angiotensin 1
- B) 1, 25 Di hydroxy cholecalciferol
- C) Erythropoietin

D) Renin

Question 133: HRT is helpful in all of the following except ?

- A) Vaginal atrophy
- B) Flushing
- C) Osteoporosis
- D) Coronary Heart Disease

Question 134: Hypothyroidism in pregnancy is least likely associated with

?

- A) Recurrent abortions
- B) Polyhydramnios
- C) PIH
- D) Preterm labour

Question 135: Immediate response to tissue injury ?

- A) Neutropenia
- B) Neutrophilia
- C) Monocytosis
- D)

Question 136: Impact and efficiency of iodine program impact can be

given by ?

- A) Goitre in pregnant women
- B) Neonatal thyroxine levels
- C) Urinary iodine
- D)

Question 137: In a case of injury to male urethra below the perineal

membrane, urine drains into ?

- A) Deep perineal pouch
- B) Superficial perineal pouch
- C)
- D)

Question 138: In a case with blunt injury abdomen, the incision for

emergency laparotomy should be ?

- A) Paramedian incision

- B) Midline incision
- C) Transverse upper abdominal incision
- D) Subcostal incision

Question 139: In a patient with cardiogenic shock and anterior wall

infarction, best treatment of choice is ?

- A) Angiography with angioplasty
- B) Intraaortic balloon pump (IABP)
- C) Dopamine
- D) Streptokinase

Question 140: In Bishop's score all are included except ?

- A) Effacement of Cervix
- B) Dilatation of Cervix
- C) Station of head
- D) Interspinous diameter

Question 141: In Caudal block for infant which is Contraindicated ?

- A) remifentanil
- B) sufentanil
- C) morphine
- D) butorphanol

Question 142: In MEN 1, most common is ?

- A) Insulinoma
- B) Gastrinoma
- C) Glucagonoma
- D)

Question 143: In pelvic fractures the most likely structure to get injured is ?

- A) Urethra
- B) Urinary bladder
- C) Ureter
- D)

Question 144: Indicator for CSF leak ?

- A) Beta 2 transferrin
- B) Beta protein trace
- C) Dye test
- D)

Question 145: Investigation not required in osteosarcoma ?

- A) MRI femur
- B) Bone marrow biopsy
- C) CT chest
- D) Bone Scan

Question 146: Investigation of choice to diagnose amyloidosis ?

- A) Rectal biopsy
- B)
- C)
- D)

Question 147: Iron deficiency anaemia is associated with ?

- A) Increased TIBC, decreased Ferritin
- B) Decreased TIBC, decreased Ferritin
- C) Normal TIBC, decreased Ferritin
- D) Normal TIBC, increased Ferritin

Question 148: Isotope used in radioisotope scanning is ?

- A) I 131
- B) I 123
- C) I 125
- D) I 127

Question 149: In LAC OPERON function of cap gene ?

- A) negative regulation
- B) positive regulation
- C)
- D)

Question 150: Lamina Cribrosa is not formed in which of the following

conditions ?

- A) Morning Glory Syndrome
- B) Nanophthalmia
- C) Coloboma of retina
- D) Optic nerve agenesis
